CONTAINER SOLUTIONS

CTF's **Container Solutions** are engineered to deliver full operational capability wherever it is required. Designed for rapid deployment and built to withstand demanding environments, our modular container solutions provide secure, ergonomic, and high-performance workspaces in remote, temporary, or evolving operational sites.

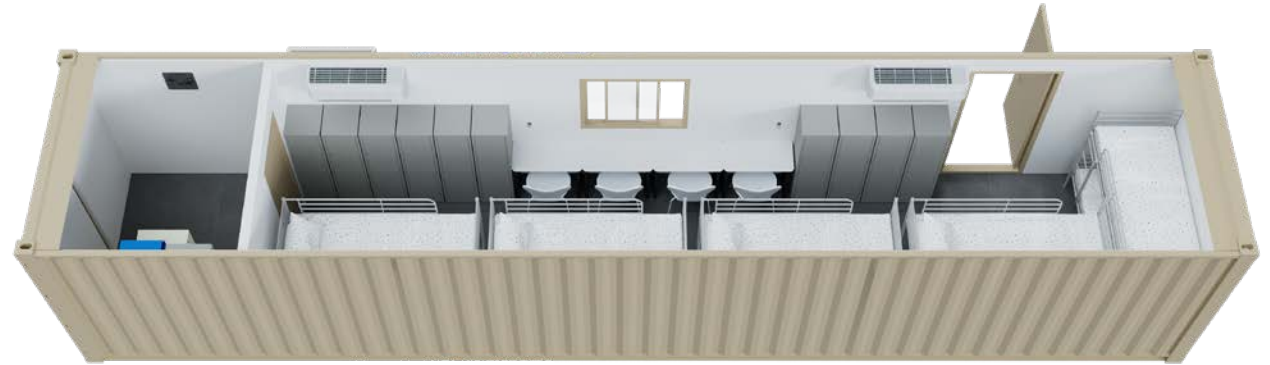

From energy projects and infrastructure works to defence, utilities, mining, and emergency response operations, CTF container solutions ensure continuity, reliability, and efficiency, without compromising on comfort or design. Each unit is fully customisable and built around your operational requirements.

Purpose-Built for Critical Environments

Our container solutions are not standard converted shipping containers. They are engineered solutions designed to function as high-performance command and monitoring centres.

Applications include :

- ★ Temporary control rooms during plant upgrades
- ★ Remote site monitoring stations
- ★ Construction project command centres
- ★ Oil and gas field operations
- ★ Defence and security deployments
- ★ Utility and infrastructure monitoring
- ★ Emergency response units
- ★ Mobile drone monitoring stations

Engineered for Performance

Every CTF container solution is built with a focus on durability, functionality, and operator wellbeing.

Structural & Environmental Design

- Reinforced steel container structures
- Thermal insulation for extreme climates
- Acoustic treatment for noise control
- Fire-rated wall and ceiling panels (where required)
- Weather resistant exterior finishing
- HVAC systems designed for continuous operation
- Controlled ventilation systems

Fully Integrated Control Room Interiors

Where required, the container solutions can be fitted with ergonomic technical consoles for monitoring and surveillance.

Custom Console Integration

- ISO-11064 aligned ergonomic layouts
- Modular console systems
- Sit-stand height adjustable options
- Multi-monitor support configurations
- Integrated cable management
- Smart power distribution
- Built-in lighting solutions
- Equipment racks and server integration

Electrical & Technical Infrastructure

CTF container solutions are delivered fully fitted and operational

- Integrated power distribution systems
- Smart PDUs
- UPS integration
- Backup generator compatibility
- Structured data cabling
- Network integration
- Access control systems
- CCTV and monitoring integration
- Redundant systems (where required)

Built Around Your Operations

Every container solution project begins with a deep understanding of your workflow, technical requirements, and deployment conditions.

Our team works closely with consultants, operators, and project stakeholders to design an optimised internal layout, ensure efficient cable and power routing, maintain safe operator circulation, provide clear equipment access, and allow future scalability.

From concept to commissioning, CTF manages every stage of the process with precision and attention to detail.
