VIDEOWALL

Stands

Engineered to ISO 11064-4, CTF's **videowall stands** provide a robust, free-standing frame for mounting multiple monitors into a seamless display — no wall required. Integrated cable management and heat dissipation ensure clean installation and reliable performance across control rooms, broadcast studios, retail, and corporate environments.

**Designed and built for
top-tier performance,
efficiency, and style.**

System

ISO 14001
Environmental
Management System

Designed with a compact footprint and engineered to deliver performance, efficiency, and style.

Fully integrated cable management through the videowall frame separating power and data cables.

Fully customisable screen configurations.

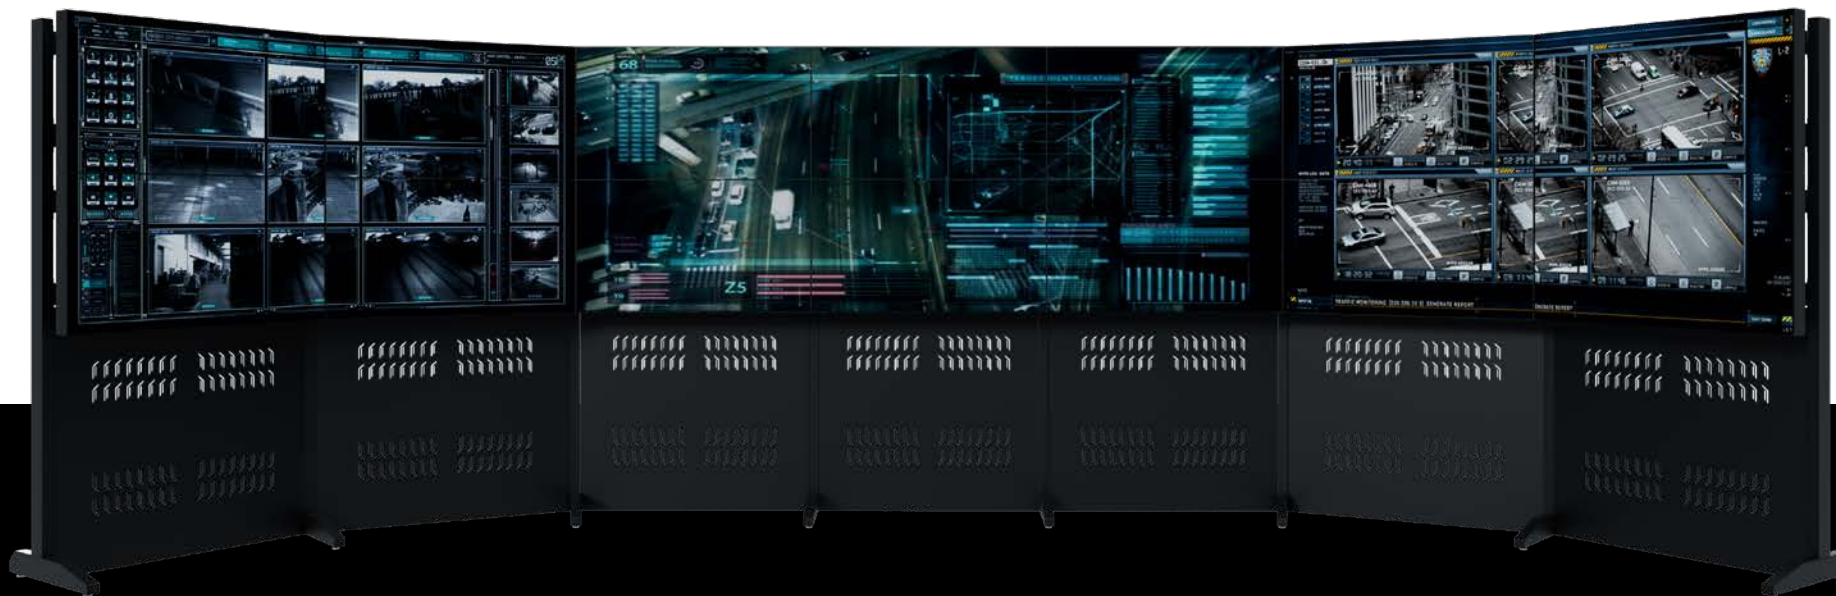

Fixed or pop-out type screen mounts.

Custom LED lighting.

Designed with heat dissipation in mind with cooling fans and air vents.

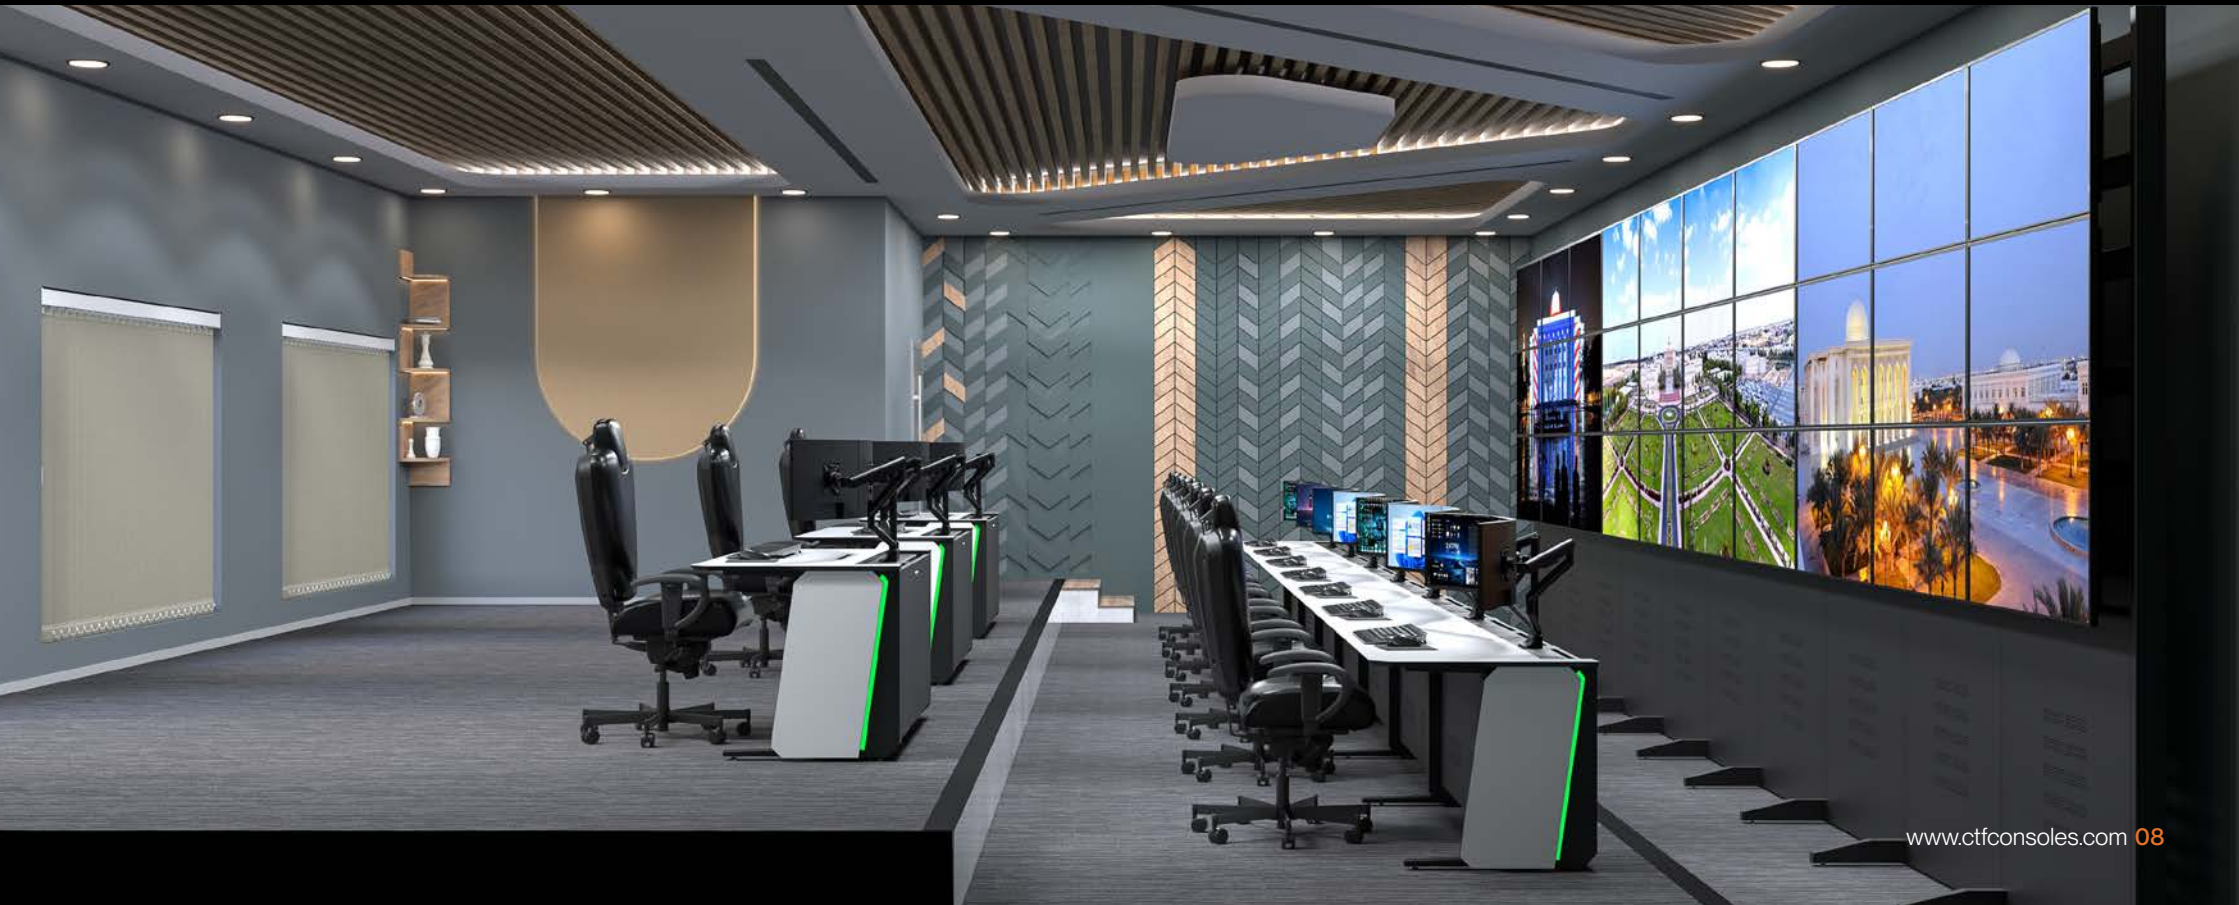

Secure workstation housing as an add-on.

Constructed in a modular fashion for quick on-site assembly.

Consoles designed to deliver top-tier performance in compact spaces.

Our Certification

Warranty

Our videowall stands come with a 10-year warranty on all metal parts, a 2-year warranty on all electronic components with hands-on after-service support with next-day rectification of issues for UAE-based projects supported by over-the-phone technical support whenever required.

Antibacterial Videowall

CTF's high-pressure laminate (HPL) videowall stands are rigorously tested for antibacterial activity using the JIS Z 2801:2010 standard. Results confirm a 99.99% reduction of harmful bacteria like Staphylococcus aureus, Escherichia coli, and Pseudomonas aeruginosa.

Quality Certification

CTF is dedicated to excellence in quality and service, ensuring that all products leaving the factory meet the highest standards. This commitment is demonstrated by the ISO certifications the company has earned.
